Introduction

In order to safeguard and promote the welfare of children and young people, all practitioners working with children/young people and with adults who are parents or carers must have knowledge and skills to carry out their own roles. This includes being able to recognise and raise safeguarding concerns. They must also be able to work effectively with others within their own agencies and across organisational boundaries.

All the learning activities in this programme are aimed at supporting professionals at all levels to build and consolidate their knowledge of safeguarding issues, including the child protection process. Importantly, this programme of learning aims to:

- Achieve a shared understanding of roles and responsibilities;
- Improved communication between professionals and others working with children, young people and families;
- Improve effective partnership working based on sound working relationships and effective decision making.

The Hartlepool and Stockton-on-Tees Safeguarding Children Partnership (HSSCP) is committed to providing a comprehensive and effective multi-agency safeguarding training programme to agencies within the Hartlepool and Stockton-on-Tees area, supporting professionals and volunteers in their work to safeguard and promote the welfare of children and young people.

HSSCP aims to deliver all multi-agency safeguarding learning activities via various media. Due to the current Covid-19 situation, some sessions will be delivered using a blended learning approach and may include pre-course reading/activities to be undertaken prior to the date of the training and a further presentation being delivered virtually to a multi-agency audience.

If you have any queries about any of the courses within this programme please contact the Hartlepool and Stockton-on-Tees Safeguarding Children Partnership Team via:

Training Principles

All elements of this multi-agency learning and development to safeguard and promote the well-being of children and young people are based on the following principles:

Child Centred

Incorporating and promoting children's rights and needs and ensuring their welfare is paramount.

Partnership with Parents and Carers

Promoting partnership and meaningful relationships with parents and carers and recognising their strengths in responding to the needs of their child(ren).

Inclusion

Respecting the diversity and cultures of a range of individuals and organisations, which have responsibility for safeguarding and promoting the well-being of all children and young people.

Inter-agency Collaboration

The purpose of multi-agency safeguarding and child protection learning and development for inter-agency work at both strategic and operational levels is to achieve better outcomes for children and young people by developing:

- A shared understanding of the tasks, processes, principles, roles and responsibilities outlined in national guidance and local arrangements for safeguarding children and promoting their welfare;
- More effective and integrated services at both the strategic and individual case level;
- Improved communication and information sharing between professionals, including a common understanding of key terms, definitions and thresholds for action;
- Effective working relationships, including an ability to work in multi-disciplinary groups or teams;
- Sound child focused assessments and decision making;

You will find links to the toolkit throughout the course. Otherwise, you can download the full toolkit [here](#).

Developed by Brook and funded by the Department of Health, the tool is designed to help healthcare staff in preventing, identifying and responding to child sexual exploitation.

The tool takes around 40 minutes to complete and uses video clips and anonymous case studies to develop staff's knowledge of the signs of CSE. It was extensively piloted with staff from a variety of different health roles, from frontline to back office.

The tool sets out the legislative background to CSE, gives examples of physical and behavioural signs of someone who may be affected by or at risk of CSE, advises how to respond in a way that will not put the young person in further danger, and discusses the different forms CSE can take, along with how approaches to helping young people may vary by age group.

Gender Variance / Gender Dysphoria

The transgender condition is understood increasingly to have its origins before birth. Research studies indicate that the baby's brain development does not always coincide with the sex differentiation of the baby's body. This overwhelming sense of feeling like the opposite gender causes strong discomfort and is called gender dysphoria.

This resource is designed to help Health Professionals respond to the needs of adults and young people experiencing gender dysphoria. The numbers of trans people presenting for medical help are rising rapidly; accordingly, the waiting lists for access to specialist providers grow longer. The mental health of those unable to access treatment is likely to deteriorate and self-medication with products bought via the internet is common. The risk of self-harm and suicide in people unable to access treatments may be as much as twenty times greater than in the general population. However, with the appropriate medical care, outcomes can be very positive.

Mental Health / Wellbeing

MindEd Core Curriculum

The MindEd Core Curriculum is directly aimed at all adults working as professionals or volunteers with children and young people and is not aimed specifically at a specialist child mental health audience. It offers e-learning to inform about the mental health of children and young people, what goes wrong and what can be done to help. It provides a wealth of information on child development, how problems show and will give practical insights into when to be concerned, what to do and when to refer on to specialists.

The organisation realises that you may have little or no training in mental health issues in children and young people. These sessions are intended to provide you with guidance and support. Radicalisation & Terrorism

PREVENT / Channel Awareness

Prevent is about safeguarding young people to keep them both safe and within the law. It is part of the Home Office's Counter Terrorism Strategy known as Contest. The Prevent Duty is not about preventing young people from having political and religious views and concerns but about supporting them to use those concerns or act on them in non-extremist ways.

This free e-learning course from the Home Office includes information on how Channel links to the government's counter-terrorism strategy (CONTEST) through the Prevent strategy. It also provides guidance on how to identify people who may be vulnerable to radicalisation and how to refer them into the Channel programme.
