

Information Sharing to Safeguard Children

You **must** share relevant information about a child at any time, **even without consent**, if you suspect a child is at risk or to protect them from harm.

Sharing this information could save their life by getting them the **right help at the right time**.

“No single practitioner can have a full picture of a child’s needs and circumstances so effective sharing of information between practitioners, is essential to keep children safe.”

To share information with confidence, take our e-learning course on Information Sharing. HSSCP Partners can register for **FREE** e-learning courses at tsab.org.uk/training
